

Blue Skies Environmental

ABOUT US

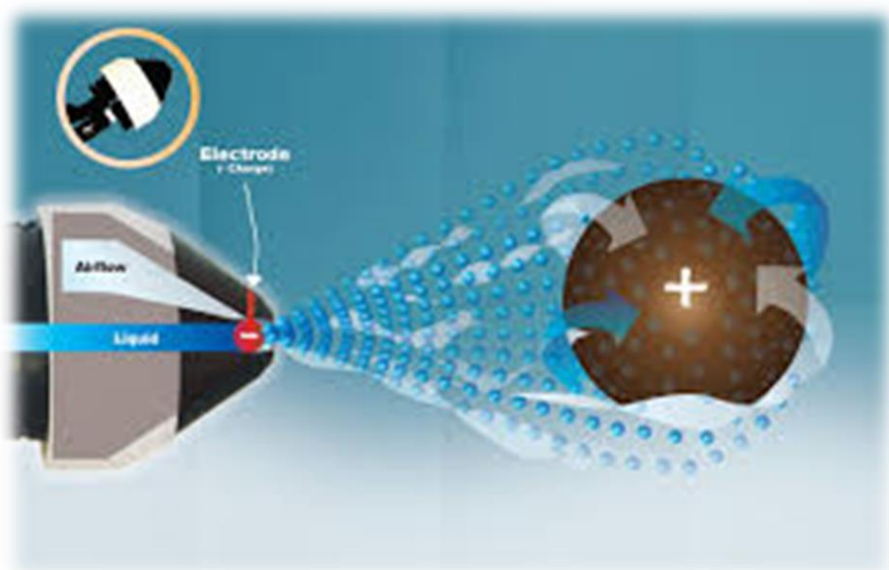

We are a regular family, doing our best to protect the ones closest to us. Staying safe and healthy is tough, toss in a pandemic and it's near impossible. We have a solution to make it easier for you too.

WHAT WE OFFER

Peace of mind. No harmful after effects.

Let us give you peace of mind by sterilizing your space quickly and effectively. The solution kills 99.99% of fungus, mold, mildew and bacteria at the source with no after effect, no residue getting you back to life.

THE PROCESS

Electrostatic spray applies an electric charge to droplets which are then attracted to surfaces. The surfaces are wrapped entirely disinfecting hard-to-reach areas, like door handles and underneath railings in seconds.

THE TECHNOLOGY

We use machinery that sterilizes every square inch of your space, harmlessly. Our hospital grade disinfectant is hypo-allergenic, bleach and odor free, safe for use near kids and pets.

WEEKLY – BIWEEKLY – MONTHLY – ONE TIME USE
